

ABOUT ME

I am currently pursuing a Bachelor of Commerce in Information Systems, with a strong foundation in both technical and business disciplines. My academic journey has equipped me with experience in software development, utilising C#, Python, SQL, and IT Infrastructure, while also providing insights into project management and Enterprise Architecture. Additionally, I have a solid understanding of business management and entrepreneurship, allowing me to bridge the gap between technology and business solutions. I am eager to apply my skills and knowledge in a dynamic, real-world environment to contribute to organizational success.
